PROMPT - follow these instructions

This sheet shows one real living room, ceiling 2500 mm. IMAGE 1 is a 3D view. IMAGE 2 is the same room from above.

Keep every wall, window, door and piece of furniture exactly where and as large as drawn. Change only materials, colours, textures and light.

Use IMAGE 2 for the true positions of the walls and furniture. The room ends at the walls shown in IMAGE 2; do not extend it. The walls nearest the camera were removed in IMAGE 1 only to see inside; they stand where IMAGE 2 shows them.

Keep each piece of furniture as close to IMAGE 1 as possible: the same doors, drawers, open shelves, dividers and proportions. Do not add doors, drawers, shelves or panels that IMAGE 1 does not show, and do not remove any.

The two oak wall units are custom-built: keep every door, open shelf, divider and compartment exactly as drawn. The tall unit with shelves on both sides of two large doors is a fold-away bed cabinet; its top row of compartments is open, with no doors.

The room has two open doorways, 1000 x 2000 mm, with no door leaf, and one window, 1200 x 1500 mm with its sill at 700 mm; daylight comes in through it.

Style: rustic earthy - warm limewash walls, wide-plank smoked oak floor, linen and wool in olive, ochre and terracotta, a jute rug, wrought-iron details, warm golden-hour light and 2700 K lamps.

Add no furniture or decor. Do not show the labels or any text from this sheet.

Return one photorealistic interior photo from the viewpoint of IMAGE 1 only.
