PROMPT - follow these instructions

This sheet shows one real living room, ceiling 2500 mm. IMAGES 1 to 4 show it from four sides. IMAGE 5 is the same room from above.

Keep every wall, window, door and piece of furniture exactly where and as large as drawn. Change only materials, colours, textures and light.

Use IMAGE 5 for the true positions of the walls and furniture. The room ends at the walls shown in IMAGE 5; do not extend it. In IMAGES 1 to 4 the walls nearest the camera were removed only to see inside; they stand where IMAGE 5 shows them.

Use IMAGES 1 to 4 together to get each piece of furniture right from every side: the same doors, drawers, open shelves, dividers and proportions. Do not add doors, drawers, shelves or panels that these images do not show, and do not remove any.

The two oak wall units are custom-built: keep every door, open shelf, divider and compartment exactly as drawn. The tall unit with shelves on both sides of two large doors is a fold-away bed cabinet; its top row of compartments is open, with no doors.

The room has two open doorways, 1000 x 2000 mm, with no door leaf, and one window, 1200 x 1500 mm with its sill at 700 mm; daylight comes in through it.

Style: rustic earthy - warm limewash walls, wide-plank smoked oak floor, linen and wool in olive, ochre and terracotta, a jute rug, wrought-iron details, warm golden-hour light and 2700 K lamps.

Add no furniture or decor. Do not show the labels or any text from this sheet.

Return one photorealistic interior photo from the viewpoint of IMAGE 1 only.
